

REVROY

Solutions For Controlled Access

REVROY Parking Guidance System-RR-PGS-ML360

The Parking Guidance Solution from REVROY comprises of the following items:

- A unified unit comprising of an Ultrasonic Sensor and a multi-colour LED array display
- A Node Controller
- A Master Controller
- A hand-held remote for configuring the sensors and setting the LED colour code.
- Parking Guidance Software

Ultrasonic Sensor

The Ultrasonic Sensor is an electronic device that emits ultrasonic sound waves that measures the distance of an object from its position. This reflected sound wave is converted into an electrical signal. Ultrasonic sound waves travel faster than audible sound.

Ultrasonic sensors have two main components, the Transmitter (which emits the sound using piezoelectric crystals) and the receiver which encounters the sound after it has travelled to and from the target.

In order to calculate the distance between the sensor and the object, the sensor measures the time it takes between the emission of sound by the transmitter to its return to the receiver.

LED Red/Green Slot Availability Display

The Unified Sensor Unit is built-in with an array of Light Emitting Diodes that glow

Red on receiving signal when there is a vehicle in the sensing area (Car Parking Slot). In case of no occupancy of the said area, the LED array glows Green as a standard unless an alternate colour code is chosen to indicate the designated slot for a specific type of vehicle/application. (viz. **Blue** for VIP/Expectant Mothers/Handicap Drivers etc.; **Magenta** for Reserved/ Electric Vehicles etc. as may be desired by the customer)

Node Controller

The Node Controller receives the data (Slot Occupied/Slot Empty information) from the Ultrasonic Sensor Unit and transmits the information to the Master Controller. The Revroy Node Controller has the capability to connect to 60 Sensors. Therefore, for every 60 Sensors One Node Controller is added to the system.

Master Controller

The Master Controller receives the data (Slot Occupied/Slot Empty information) from the Node Controller Unit and transmits the information to the S/W. The Revroy Master Controller has the capability to connect to 60 Node Controllers. Therefore, for every 360 One Master Controller is added to the system. A Master Controller doubles up as a Node Controller i.e. it may be connected to 60 Devices on its own.

REVROY PGS Software Ware

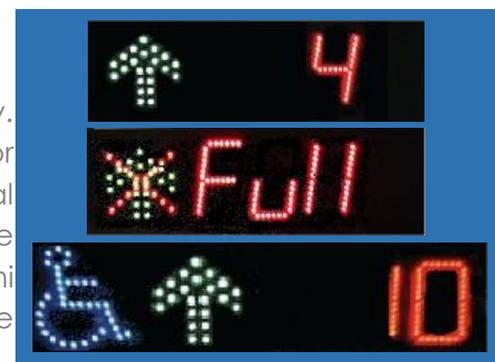

The entire Parking Management solution is controlled by the REVROY PGS S/W. The S/W allows integration, Control, Billing provide Device Status. It additionally also offers the feasibility to integrate a Commercial Parking Management System. The S/W feature allows the possibility to initiate Voice Commands viz. Good Morning/Welcome/ Good Bye etc. Other devices that form a part of the Parking Management/Guidance Solution may also be remotely from the Central/Master Control Room be monitored and controlled. The S/W offers a Graphic User Interface, vividly displaying the entire parking layout in a manner that is clear & pleasing to the eye.

Display Signage

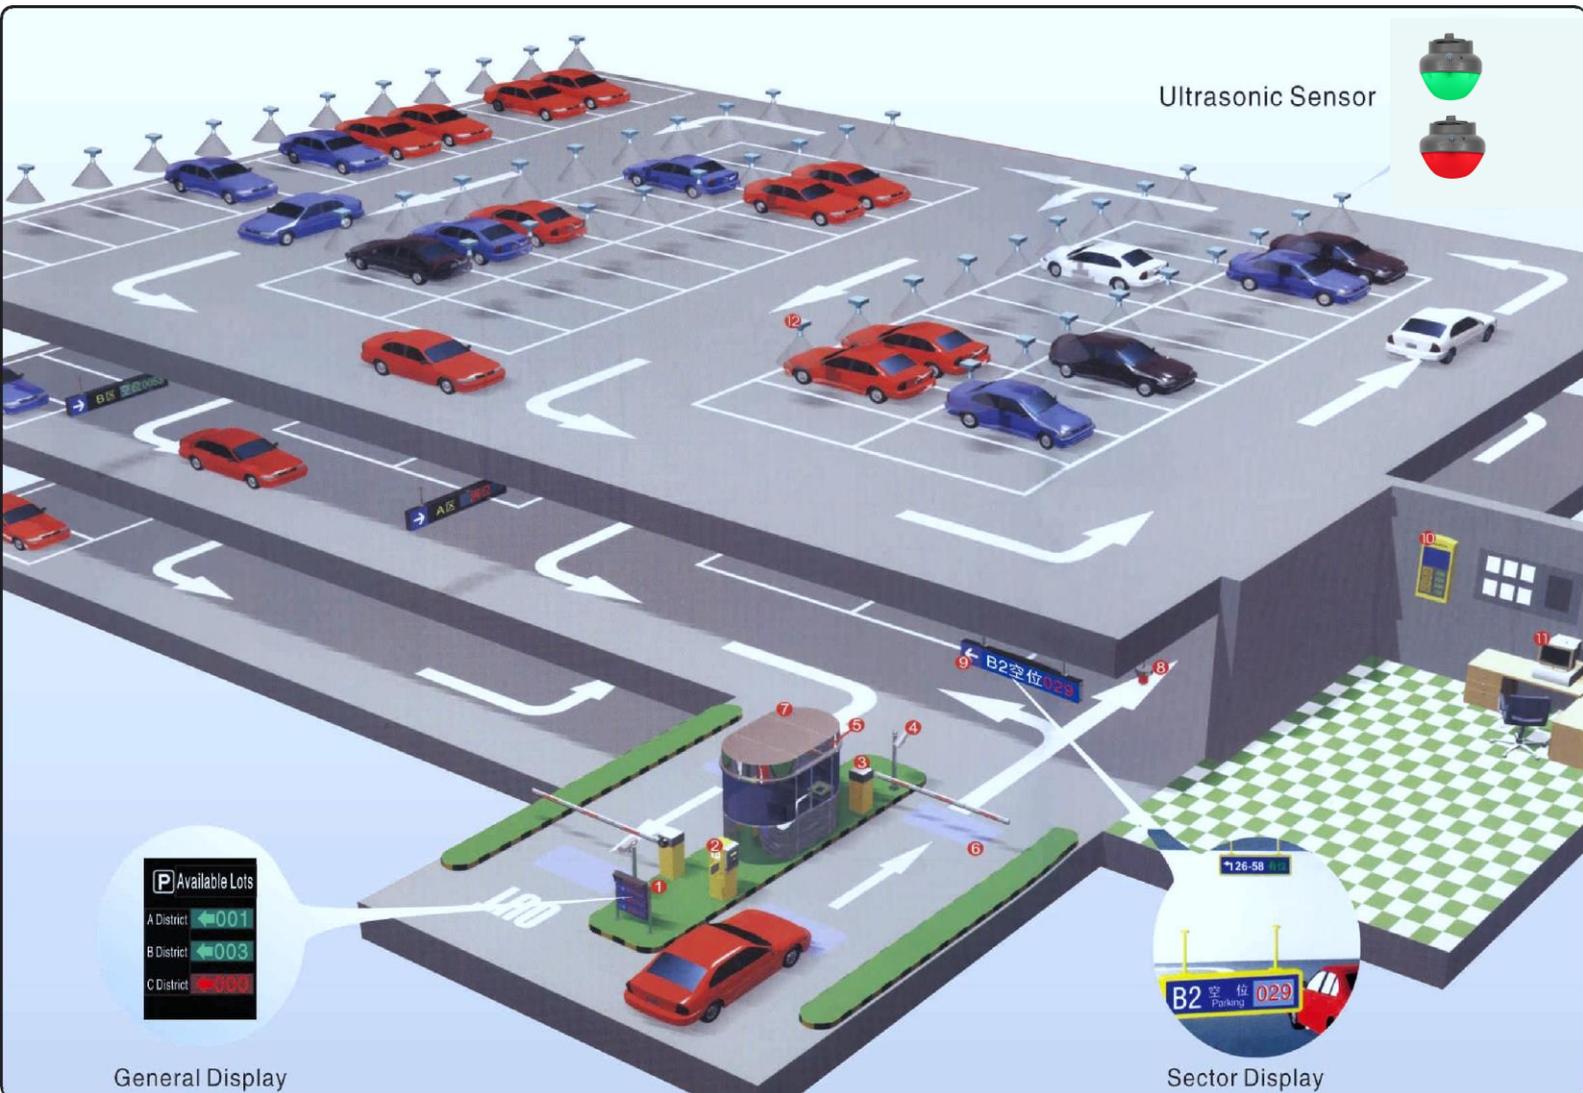

LED Display Signage may be provided to indicate slot availability. Display Signages are of two types Outdoor & Indoor. Outdoor Signages indicate total slot availability. In case of an MLCP additional information pertaining to slots available on each level can also be provided. Indoor Display Signages are of the following types- Uni Directional, Bi- Directional & Tri-Directional. These signages provide

the following information:

- ⚙️ "0"- "Full" Indicating No slot availability;
- ⚙️ Number of Slots Available
- ⚙️ No. of Handicap Slots Available

Composite Elements of the REVROY Parking Guidance Solution

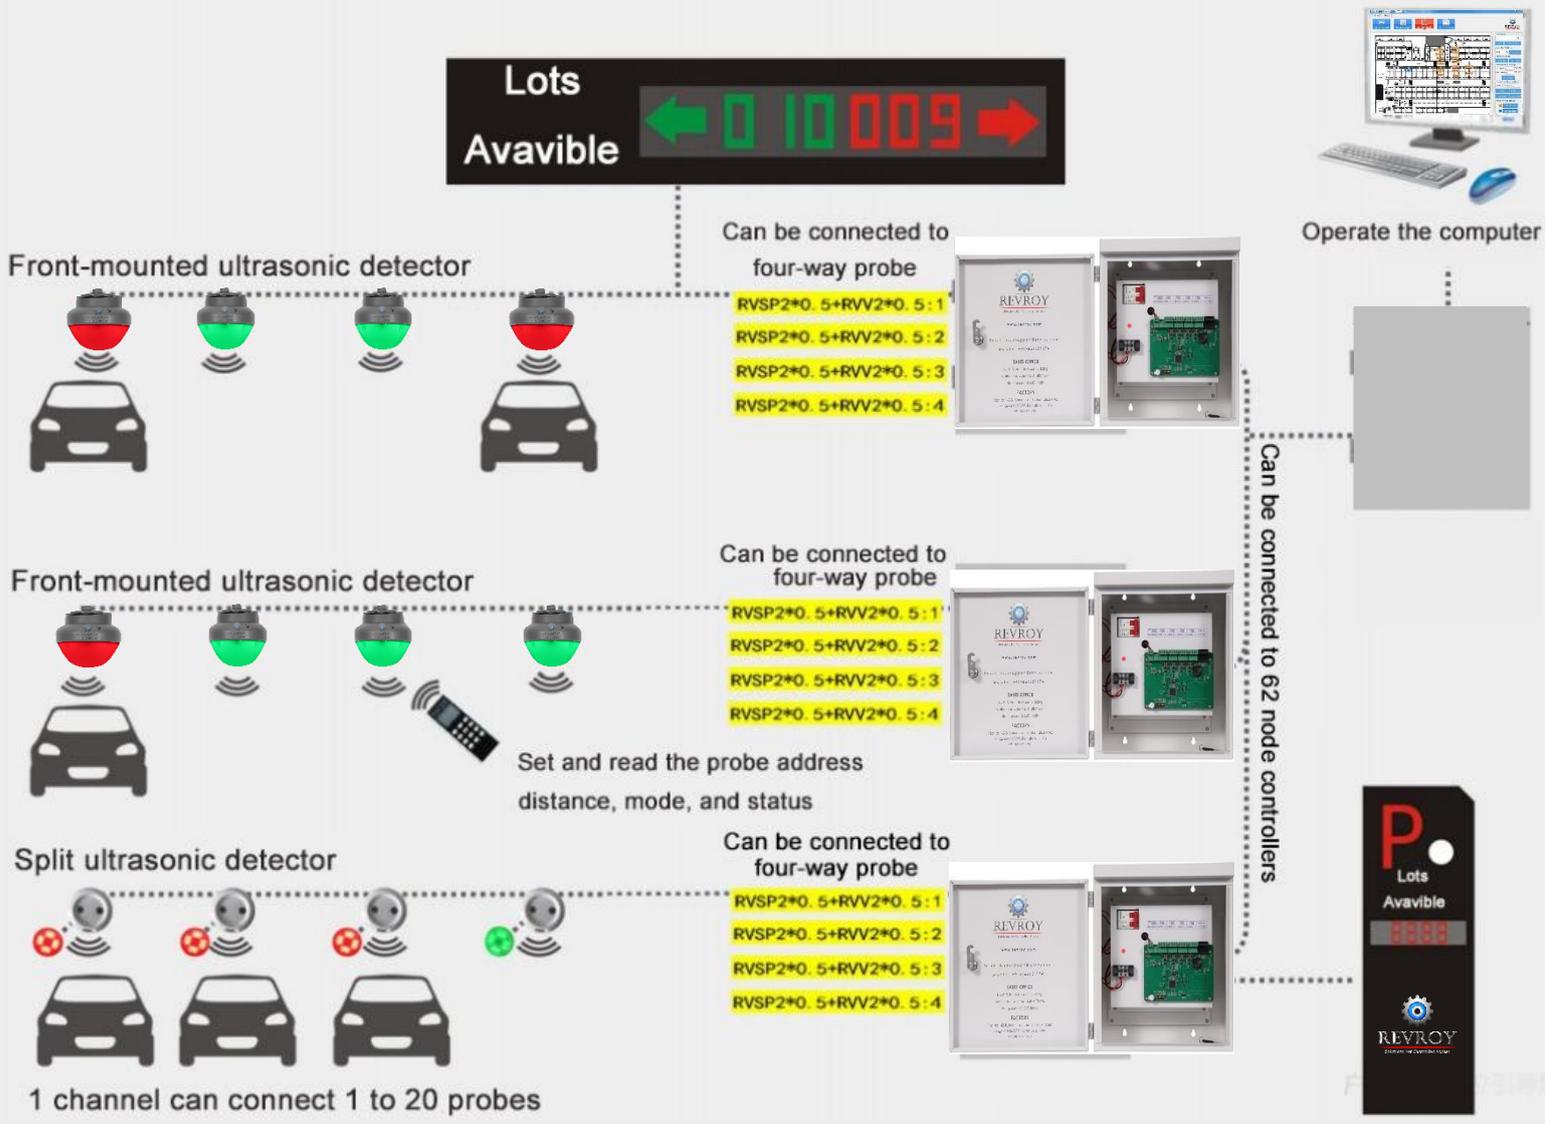

The above visual representation serves better understanding of the various components that go into a PGS Systems Solution.

- ⚙️ Entry Barriers
- ⚙️ Ticketing System-If the installation is in a Paid Parking facility
- ⚙️ Exit Barrier
- ⚙️ Security/Ticketing Booth
- ⚙️ Main display Signage-Representing Slot availability in all the levels of the parking.
- ⚙️ Guidance Signage upon entry-Directing Drivers in the right direction and displaying slot availability
- ⚙️ Installation of Ultrasonic Sensors with built in Led Lights
- ⚙️ Central Control Room

REVROY PGS System Architecture

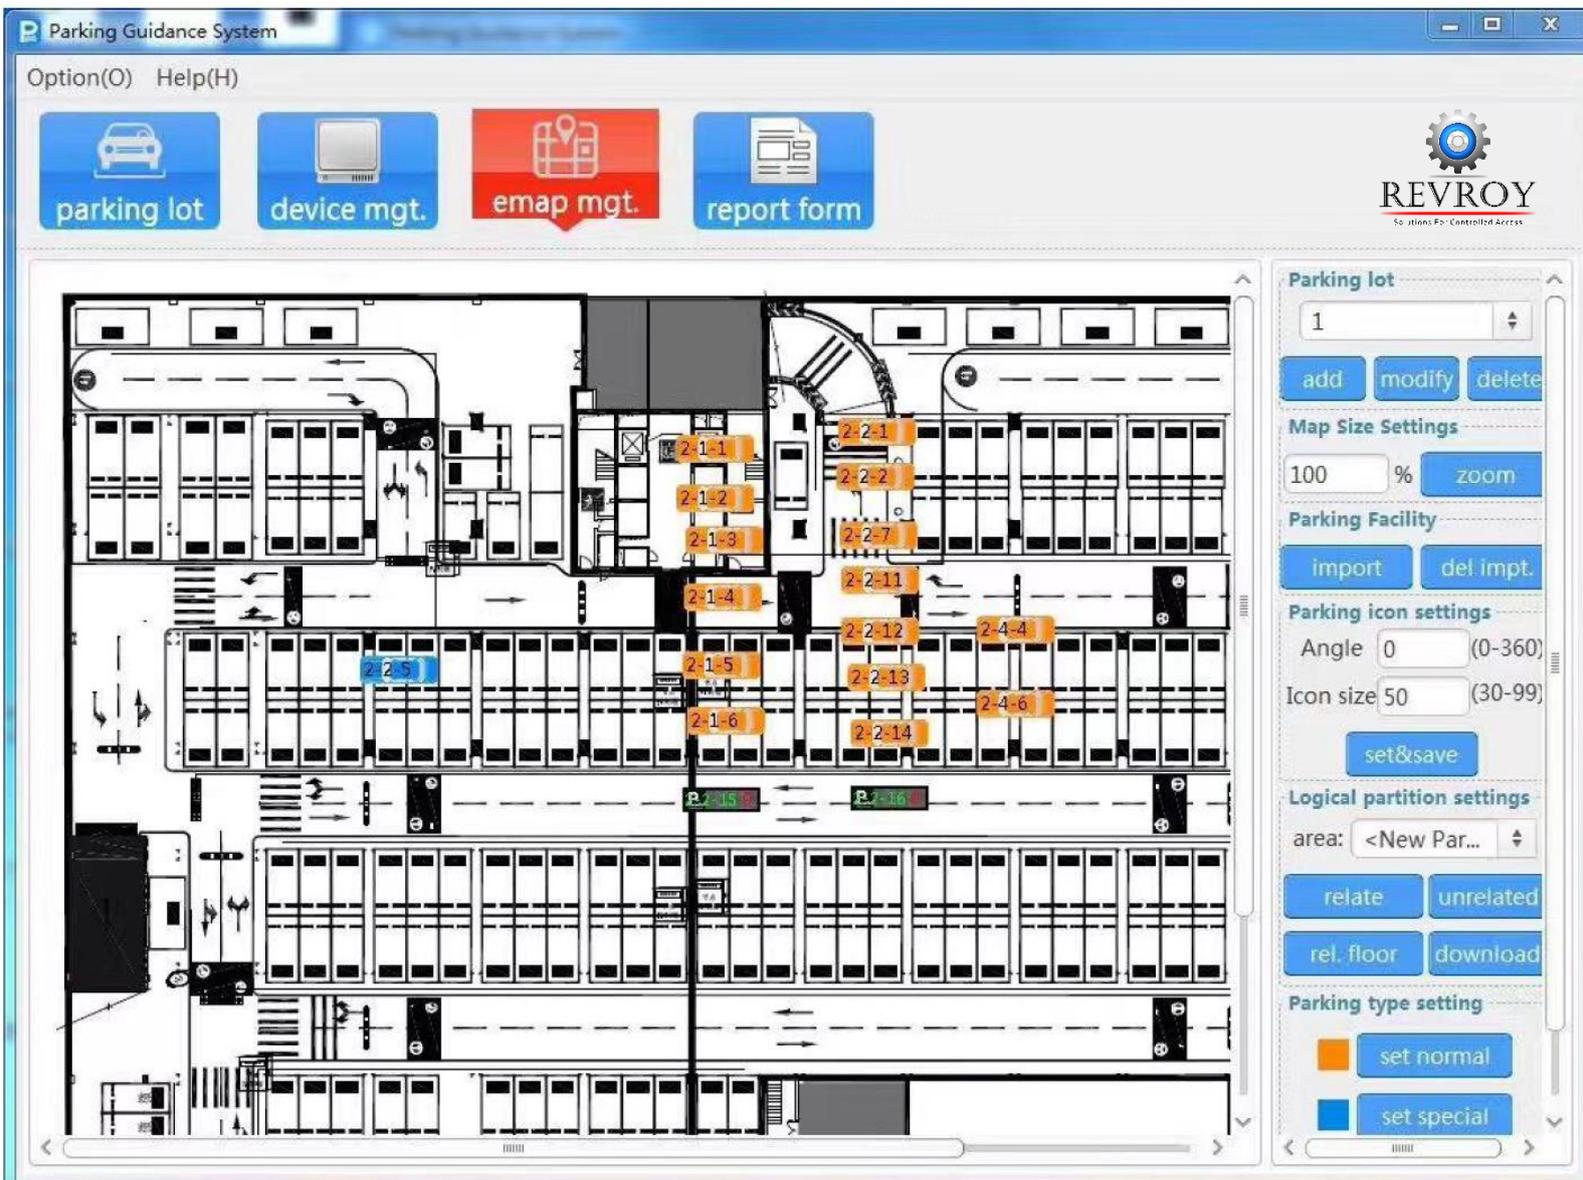

The Handheld Remote offers the Ease & Flexibility of Set-Up

- ⚙ **Set & also Read the ultrasonic**
 - Address
 - Distance,
 - Mode and
 - Status
- ⚙ **Communicate**
 - Mode:
 - Sensor
- ⚙ **Detect distance:**
 - 1.5 meters

REVROY Parking Guidance System Software

Features of the REVROY PGS S/W

- ⚙ Parking guidance function
- ⚙ Fixed parking space protection function (customizable)
- ⚙ Real-time monitoring of parking space status
- ⚙ Statistics function
- ⚙ Parking time detection function
- ⚙ Access control function
- ⚙ Language and special functions can be customized

Node Controller Technical Parameters	
Standard sizes	280×260×100mm
Net weight	3.75Kg
Shell material	Gray cold steel paint
Operating temperature	-20°C ~ +65°C
Communication Method	1 CAN @ 20kbps 4 channels RS485 @ 9600bps
Communication Distance	CAN : ≤1000m (RVSP 0.75*2) RS485 : ≤150m (RVSP2*0.5)
Power consumption	≤2W(Own power consumption, without detector)
Horizontal position	Level 0~1m (recommended 0.3~0.5m)
Installation height	Vertical 2 ~ 3m (recommended 2.5m)
Operating Voltage	AC 110~240V
Node controller capacity	60pcs ultrasonic

Central Controller Technical Parameters	
Standard sizes	280×260×100mm
Net weight	3.36Kg
Shell material	Gray cold steel paint
Operating temperature	-20°C ~ +65°C
Communication method	1 CAN @ 20kbps 1 channel 10/100BaseT Ethernet
Communication distance	CAN : ≤1000m (RVSP 0.75*2) Ethernet: 100m (super Category 5 network cable)
Power consumption	≤3 W
Horizontal position	Level 0 ~ 1m (recommended 0.3 ~ 0.5m)
Installation height	Vertical 2 ~ 3m (recommended 2.5m)
Operating Voltage	AC 110 ~ 240V
Central controller capacity	60pcs node controller

Indoor Display Technical Parameter	
Operating Voltage	AC 110~240V
Operating	RS485 @ 9600bps
Power consumption	≤10W(unidirectional)
Communication distance	≤300m
Operating temperature	-20°C ~ +65°C
Light source	Red/green LED lamp beads
Environment humidity	≤ 90% RH (No condensation)
Case material	Cold steel paint + plexiglass panel

Outdoor Display Technical Parameter	
Operating Voltage	AC 110~240V
Operating	RS485 @ 9600bps
Power consumption	≤10W
Communication distance	≤300m
Operating temperature	-20°C ~ +65°C
Protection level	IP67
Dimension	2200 X 75 X 20 mm
Case material	Cold steel paint + plexiglass panel
Light source	Red/green LED lamp beads

Parking Guidance System Construction Wires		
Item	Specification	Unit
Controller communication shielded wire	RVSP2*1.0	Meter
Controller 220V power supply line	RVV3*1.0	Meter
Ultrasonic detector communication shielded wire	RVSP2*0.5	Meter
Ultrasonic detector 24V power supply line	RVV2*0.5	Meter
Bridge galvanized trough type	80 mm X 50 mm X 0.8	Meter
Bridge 90 Degree Elbow	80 mm X 50 mm X 0.8	PCS
Bridge Tee	80 mm X 50 mm X 0.8	PCS
Bridge screw hanging frame	M8	SET
Auxiliary material		LOT
Metal coated hose	M20	Meter
PVC Conduits / Galvanized Pipe 3 meters	Pipe Diameter 25 mm X 1.0 mm Thickness	PCS
